

WHITE SPRUCE ARCHAEOLOGY INC.

WE CAN HELP YOU THROUGH THE HRIA PROCESS

Do you require a Heritage Resource Impact Assessment (HRIA)?

Did you receive a letter from the Archaeological Assessment Services Unit (AASU)?

Are there concerns with the current proposed plan?

White Spruce Archaeology Inc. makes sure our clients are in full compliance with all government regulations and guidelines.

WHAT WE DO

- Apply to the Manitoba Heritage Resources Branch (HRB) for the necessary Heritage Permit to conduct an HRIA
- Work with HRB to identify best practices for the HRIA
- Request known archaeological site data from HRB
- Review available literature and maps about the area, examine current study area conditions to assist in the identification of heritage potential
- Conduct a review and summarize what is known about the archaeology, history, and prehistory of the study area.
- Conduct archaeological field work with qualified archaeologists
- Document the area of pedestrian survey using the tracking function on a GPS
- Record the location of all excavated test pits using a GPS
- Document the types of soils found in test pits in notes, sketches and/or photographs
- Write a full report and make recommendations about the area with regards to its archaeological potential to satisfy the requirements established by HRB

Dr. Linda Larcombe is a broadly trained archaeologist and anthropologist who has worked in Manitoba and Ontario since 1998.

Mr. Matthew Singer is an archaeologist who has worked in Manitoba and Ontario since 2006.
